Job description

Job Description: AI Trainee

Location: Hinjewadi Phase 2, Pune

Work from Office

Immediate Joiner

Compensation Structure:

- **Stipend (Probation Period – 6 months): ₹10,000 per month**
- **Post Probation Period (Next 12 Months): ₹20,000 per month**
- **After 18 months: ₹3.4 – ₹5.4 LPA (Based on the performance during 18 months)**
- **Note: Mandatory 18-month contract Agreement**

About Rasta.AI:
Rasta.AI is revolutionizing road safety and infrastructure monitoring using cutting-edge AI technologies. Our AI-powered solutions depend on high-quality data to predict, analyze, and improve road conditions globally. At Rasta.AI, we believe impactful AI starts with precise data annotation.

Role Overview:
We are looking for a passionate and motivated AI Intern to join our team. The ideal candidate should have a strong technical foundation in Python and AI/ML concepts, along with hands-on experience in building intelligent systems. This role offers an opportunity to work on real-world AI problems and contribute to production-level solutions.

Key Responsibilities:

- Design, develop, and implement machine learning and deep learning models for real-world applications, ensuring performance, scalability, and accuracy.
- Work extensively on computer vision and natural language processing (NLP) tasks, including image analysis, object detection, text processing, and classification problems.
- Perform data collection, cleaning, preprocessing, and feature engineering to build high-quality datasets for training AI models.
- Analyze large datasets using tools like **NumPy** and **Pandas** to extract meaningful insights and improve model performance.
- Build, test, and optimize AI/ML models using frameworks such as **TensorFlow** and **PyTorch**, including hyperparameter tuning and performance evaluation.
- Deploy and manage applications using **Docker** and work with cloud platforms like **AWS** or **GCP** for scalable solutions.
- Work with databases (**SQL/NoSQL**) for data storage, retrieval, and management in AI pipelines.
- Use version control tools like **Git** to maintain clean and collaborative codebases.

- Operate within **Linux/Unix environments** and leverage **GPU acceleration (CUDA)** for efficient model training.

Required Skills and Qualification:

- Currently pursuing a **Bachelor's degree in Artificial Intelligence, Machine Learning, Computer Science, or a related field**
- Strong proficiency in **Python programming**
- Solid understanding of **Data Structures, Algorithms, and Software Engineering principles**
- Hands-on experience with **Machine Learning and Deep Learning frameworks** such as:
    - TensorFlow
    - PyTorch
- Practical knowledge of:
    - **Computer Vision (OpenCV)**
    - **Natural Language Processing (NLP)**
    - Model optimization techniques
- Experience with data handling and analysis using:
    - NumPy
    - Pandas
    - Data visualization libraries (Matplotlib, Seaborn, etc.)
- Familiarity with:
    - Model deployment using **REST APIs**
    - Containerization tools like **Docker**
    - Cloud platforms such as **AWS or GCP**
- Knowledge of:
    - Databases (**SQL / NoSQL**)
    - Version control systems (**Git**)
    - Linux/Unix environments
    - GPU acceleration (**CUDA**

Perks and Benefits:

- Internship opportunity with potential for a Pre-Placement Offer (PPO) based on performance.
- Play a crucial role in creating AI-driven solutions that positively impact society.
- Be part of an innovative team committed to technological excellence.
- Opportunity to learn, grow, and build a meaningful career in the booming AI and Data Science industry.
- Join Rasta.AI and be apart of the journey to transform road safety through data- driven AI solutions!
